

VIMAL SRIVASTAVA

Senior Backend Software Engineer | Java | Spring Boot | Microservices | Kafka
[email@example.com] | [+91 XXXXXXXXXX] | linkedin.com/in/[vimal-srivastava] | [City, India]

PROFESSIONAL SUMMARY

Senior Backend Software Engineer with 10+ years of experience designing and delivering large-scale distributed systems using Java, Spring Boot, Kafka, and Microservices architecture. Deep expertise in ISO 20022 and SWIFT payment messaging standards, with a strong record of building high-throughput payment platforms for global banking clients. Skilled in Kubernetes, Docker, CI/CD pipelines, and performance optimization, with proven experience mentoring engineering teams and supporting mission-critical production systems.

KEY ACHIEVEMENTS

- Delivered ISO 20022 and SWIFT-compliant payment processing solutions for banking clients across Europe, India, and South Africa, supporting high-volume, mission-critical transactions
- Designed and built 15+ production microservices, improving system throughput and reducing latency through asynchronous programming and multithreading
- [Add specific % or metric, e.g., "Reduced transaction processing time by X% through service optimization"]
- Mentored junior and mid-level engineers on backend architecture, coding standards, and production support best practices
- [Add any awards, certifications, or formal recognitions here]

CORE TECHNICAL SKILLS

Languages: Java, [add others e.g. Python, SQL]

Frameworks: Spring Boot, Spring MVC, REST APIs, Microservices

Messaging: Apache Kafka, ISO 20022, SWIFT

Cloud / Infra: Kubernetes, Docker, Pivotal Cloud Foundry (PCF), [AWS/Azure if applicable]

CI/CD & Tooling: Jenkins, SonarQube, Git, Maven/Gradle

Monitoring: Splunk, Dynatrace

Databases: [e.g. Oracle, PostgreSQL, MongoDB — add actual DBs used]

Practices: Agile/Scrum, Multithreading, Asynchronous Programming, Performance Tuning

PROFESSIONAL EXPERIENCE

Senior Software Engineer | DXC Technology (Mastercard Account)

[Month Year] – Present

Global IT services provider — engaged on Mastercard's payments platform

- Designed and developed scalable backend services using Java, Spring Boot, Kafka, and REST APIs for global payment processing
- Delivered ISO 20022 and SWIFT-based payment solutions supporting banking operations across Europe, India, and South Africa
- Built and maintained 15+ microservices, improving system performance through asynchronous programming and multithreaded design
- Implemented CI/CD pipelines using Jenkins and deployed services on Pivotal Cloud Foundry (PCF)
- Used SonarQube for code quality enforcement and Splunk/Dynatrace for production monitoring and troubleshooting
- Mentored engineers on backend design patterns and provided L2/L3 production support for critical payment systems

Senior Software Engineer | Patanjali

[Month Year] – [Month Year]

[Add one-line description of the business/product you worked on]

- [Add 2-4 bullets describing your responsibilities and impact in this role — technologies used, systems built, team size, measurable outcomes]

Android Developer | Aricent

[Month Year] – [Month Year]

[Add one-line description of the business/product you worked on]

- [Add 2-4 bullets describing your responsibilities and impact in this role]

Software Engineer | CRE Innovations

[Month Year] – [Month Year]

[Add one-line description of the business/product you worked on]

- [Add 2-4 bullets describing your responsibilities and impact in this role]

Software Test Engineer | Qapitol QA

[Month Year] – [Month Year]

[Add one-line description of the business/product you worked on]

- [Add 2-4 bullets describing your responsibilities and impact in this role]

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science

BMS Institute of Technology, Bengaluru | [Graduation Year]
